Art Unit: 1774

Claims 1-4 are again rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Nojima et al. for the reasons of record.

As with the other parameters discussed in the last Office action, determination of the particle size of a resin (e.g., the claimed polyolefin copolymer) in an emulsion (e.g., the claimed resin emulsion (c)) constitutes the optimization of operating conditions in the absence of unexpected results or a showing of result-effectivity. It is noted that the first full paragraph on page 10 of applicants' specification alleges the criticality of the newly recited polyolefin copolymer particle size. If these alleged results can be substantiated with objective evidence, this rejection will have been overcome. Such objective evidence would be considered by this examiner after final rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
